Personal Profile

Aspiring IT gradate with Computer Science and Informatics background; I am looking to secure a role whereby I will be utilizing the skills that I have acquired to the betterment of the company. I have interest in creating solutions that help company make better business decisions based on the data they get from their users using various data analytics techniques. In addition to the skills and qualifications, I would like to think I am a hard-working individual who works well under pressure and unsupervised as well as in teams
